

KEVIN PRASHANT VEIGAS

AI DATA OPERATIONS & EVALUATION

Mangaluru, Karnataka, India | Open to Remote & Global Roles | +91 6361299067 | kveigas825@gmail.com
LinkedIn: [linkedin.com/in/kevinveigas](https://www.linkedin.com/in/kevinveigas) | Portfolio: kveigas.github.io

PROFESSIONAL SUMMARY

AI Data Operations & Evaluation professional running human-data, reviewer, and computer-vision quality workflows for deployed AI systems. At Maneva, monitored 19 production systems, managed QA across 15,000+ images at 99%+ quality, led a 15-member team that raised annotation accuracy from ~85% to 93%, and designed sampling that cut review time by ~30%. Now delivering freelance human-data work for AI training and robotics (micro1, Outlier AI) and completing an M.S. in AI & Technology Management, with a Post-Graduate Certificate in IT Project Management (Distinction), CAPM and CSM.

PROFESSIONAL EXPERIENCE

Freelance AI Training & Human-Data Evaluation 2026 - Present
micro1 (Contract) | Outlier AI (Freelance) | Remote

Human Data (BizOps) - micro1

- Construct and evaluate realistic multi-application workflows across Excel, PowerPoint, Word, Teams, and Outlook, producing structured human-evaluation data for AI training and agent assessment.
- Review contributor submissions against detailed rubrics, validating workflow completion, active UI state, and data quality, and provide structured feedback that improves submission consistency.

Egocentric Robotics Annotation Coordinator - Outlier AI (project-based)

- Annotate first-person video of people performing physical tasks for robot-learning datasets: segmenting action phases, labeling hand-object interactions and contact, and writing natural-language task descriptions.
- Apply detailed guidelines to edge cases such as occlusion, ambiguous action boundaries, and failed attempts, and check annotations for temporal accuracy and consistency.

AI Data Operations Specialist (Contract) 2025
Maneva Inc. | Remote, Canada

- Monitored 19 deployed computer-vision AI systems in Grafana and issued daily pipeline-health reports, surfacing performance issues and blockers and reducing issue-response time by ~35%.
- Managed validation and QA across 15,000+ computer-vision images, applying anomaly checks and structured review controls that sustained 99%+ dataset quality.
- Designed accuracy-weighted QA sampling that concentrated review on lower-performing annotators and reduced sampling for consistently high-accuracy contributors, cutting review time by ~30% without reducing data quality.
- Led a 15-member annotation team and introduced structured calibration and statistical quality monitoring, including Krippendorff's Alpha, helping improve annotation accuracy from ~85% to 93%.
- Translated model and dataset health into SQL analysis, operational dashboards, documentation, and stakeholder reports, supporting cross-functional decisions and handoffs.

Associate Project Coordinator (AI/ML Operations) 2023 - 2024
ParallelDots | Remote

- Coordinated AI/ML operations across four FMCG client accounts and three time zones, supporting ShelfWatch retail computer-vision workflows for shelf monitoring and product recognition with 90%+ model accuracy.
- Analyzed historical client and product data to identify seasonal periods of increased packaging and visual change, enabling proactive planning for data drift, annotation demand, and retraining requirements.
- Identified workflow bottlenecks and coordinated retraining activities with ML engineers, contributing to a ~20% reduction in overall cycle time.
- Maintained Agile delivery and cross-functional feedback loops across annotation, engineering, and stakeholder teams using Jira and Confluence.

INDEPENDENT PROJECTS & STUDY

Open-Source AI Data Quality & Operations Tools

Self-directed | Remote

2025 - Present

- Completed structured study in LLM evaluation and RLHF (DeepLearning.AI and DataCamp RLHF courses; Lambert's RLHF textbook) and applied it in the tools below.
- DataQual - Annotation Quality Intelligence & Adaptive Label Collection**
- Live: kveigas.github.io/dataqual/ | GitHub: github.com/kveigas/dataqual
- Evolved a 2025 annotation-quality dashboard into an open-source system: agreement statistics with intervals, Dawid-Skene consensus, annotator reliability, explained review queues, and per-item adaptive label collection.
 - Published evidence: 100% label parity with the Crowd-Kit reference on a real benchmark; up to +27.4 accuracy points over majority vote with adversarial annotators; stopping at 95% confidence matched full-label accuracy in all 12 synthetic scenarios. 131 backend tests, 92% coverage.

- OpsPilot - Human-Data Campaign Operations & Delivery Control**
- Live: kveigas.github.io/opsilot/ | GitHub: github.com/kveigas/opsilot
- Built a campaign-operations cockpit with calibration-gated eligibility, quality-aware allocation, adaptive trust-based QA, Monte Carlo completion forecasts, and five delivery gates; every operation is atomic, audited, and idempotent.
 - Published evidence: across 40 synthetic workforces, adaptive QA halved undetected errors at the same review budget (1.8% vs 3.5%) and needed 43% fewer reviews for equal quality. 74 backend tests, 95% coverage.

EDUCATION

Master of Science, AI & Technology Management

Nexford University | Online, U.S.-accredited

2026 - Expected 2027

Post-Graduate Certificate, IT Project Management

Conestoga College, Ontario, Canada | Graduated with Distinction; Dean's Honour List

2024

Bachelor of Engineering, Computer Science

Visvesvaraya Technological University, India | First Class

2018 - 2023

CERTIFICATIONS

Project Management: CAPM - PMI | Certified ScrumMaster - Scrum Alliance

AI & Machine Learning: AI Product Management - Duke | Managing Machine Learning Projects - Duke | Deep Learning Specialization - DeepLearning.AI / Coursera | Machine Learning - Stanford / Coursera

SKILLS

AI Data Operations: Human Data Workflows | Dataset Validation | Annotation Operations | Reviewer Operations | Egocentric Video Annotation | Calibration | Quality Assurance | Model Evaluation | Data Drift | Escalation Management

Evaluation & Quality: Rubric-Based Evaluation | Inter-Annotator Agreement | Krippendorff's Alpha | Dawid-Skene | Adaptive QA Sampling | Error Analysis | Anomaly Detection

Analytics & Technical: SQL | Python | Pandas | Excel | Grafana | Operational Dashboards

Program & Operations: IT Project Management | Agile / Scrum | Process Optimization | KPI Tracking | Root Cause Analysis | Cross-Functional Coordination | Operational Reporting | Jira | Confluence

Development: React | FastAPI | Git | GitHub
